

WESTERN MINING DIRECTORY & WESTERN STATES MINES MAP

Special Offer! Both For \$115⁰⁰

Western Mining Directory: The Western Mining Directory has been published for 35 years. The Directory lists over 180 mining companies, 118 mines and 145 projects and properties. The Mining Company section contains telephone numbers, websites and addresses for corporate, regional, exploration and mine offices, all principle officers, and states if the company is privately or publicly held. Mine information includes names of managers, its location, and whether it is open pit or underground, its type of recovery, product, operator, reserves, grade, mining rate, and number of employees. Mining companies and mines are also listed alphabetically and geographically.

Western States Mines Map: This edition shows locations of gold, silver, platinum, copper, molybdenum and coal mines in the eleven western United States. For each mine, the Map lists the state, county, minerals produced, owner and whether it is underground or open pit. The Map is 26.75" x 40" in size and is printed in contrasting colors on enamel stock for increased legibility showing states, capitols and major highways.
